

VR01 - Multifunctional Megapixel Recorder

Function...

- VR-01 is the only recording product using Micro SD card with superhigh resolution 1280x1024 in the world. Its resolution is several times the resolution of other similar products', and more clearer than D8 camcorder's resolution, you can use it to record your life's dribs and drabs.
- VR-01 can be used as a substitute of a general camera. Its resolution is 1280x1024, far more clearer than a general camera. Please notice that the resolution of a general camera is only 640X480. If you magnify the car number-plate and human face with the video recorded by general camera, then you can't identify them as mosaic. But if you use VR-01, its high resolution 1280X1024 can magnify the car number-plate and human face and identify them clearly. This is the maximal difference of resolution between VR-01 and a general camera.
- It can match with bracket to let you install it on car, motorcycle or bike to work as car type recorder. Easy installation and convenient use, you can use it everywhere at will.
- The highest resolution of 1280X1024 can be used in monitor identify demonstration, car accident recording evidence, criminal investigation recording evidence, outdoor sport, family activity and so on. Its clear video picture can meet all kinds of your life's demand.
- It begins to record automatically when car started, and it has special car charger to supply power.
- Match with special hanging belt to take with and recording your life's wonderful segment anytime.
- Use Micro SD card as its storage (Does not limit the capacity).
- Auto mantle (Loop recording function) when Micro SD card is filled completely, and with time and date display on the recording.
- Support USB 2.0 interface to connect with computer, need not to plug and push SD Card, and need no card reader.
- Build-in chargable long time Li-battery 1100mAh / 3.7V, it can be charged by USB cable connecting to PC.
- It can be powered by external power supply (portable battery or car power supply) for long time recording.
- High resolution recording evidence gives publicity to the fact.

Specification..

Lens	Megapixel Canon high quality camera lens
Camera angle	2.0mm wide-angle lens
Horizontal viewing angle	105°
Microphone	Built-in
Resolution	1280 X 1024, 640 X 480 @30FPS
